Can anyone help me? I'm new to Python. I have created a database, and imported records from a csv file into it. After that, I created a query to select certain records from a database using a condition. When I run my script, I only get the result for the first row in my csv file. Below is my python script and my csv file. import csv import mysql.connector db = mysql.connector.connect(user='root', password='12345', database='food_database') cursor = db.cursor() with open f678ea9f9e
